

Planting Selections

A diverse collection of 29 foliage species shapes the landscape narrative at Chomley Terraces. Large-leafed Giant Taro and lush Xanadu introduce a tropical richness at the ground plane, softening the architecture and establishing a strong foundation of greenery. Towering above, the Japanese Maple and Box Elder Maple offer a shifting display of colour and texture, their canopies catching seasonal light and movement.

White Crepe Myrtle brings a graceful presence with its flowering form. Meanwhile, Boston Ivy climbs and curls across the walls, weaving a living art piece that links built form to garden. These species have been chosen not only for their beauty but also for their contributions to microclimate, resilience, and ecological diversity. This is planting with purpose, carefully layered to enhance every aspect of life at Chomley Terraces.
